

EKREM TURAN FIRAT

Undergraduate Researcher

Ankara / Sivas, Türkiye

ekremturanfirat@hotmail.com | [LinkedIn](#) | [GitHub](#) | [Website](#)

Education

Erasmus+ Exchange Program | Electrical Engineering | AGH University of Science & Technology | Krakow, Poland

2025 – 2026

Bachelor's Degree in Electrical and Electronics Engineering | Cumhuriyet Üniversitesi | Sivas, Türkiye

2024 – Ongoing

Electrical-Electronics Technology Technical Degree | Cezeri Green Technology Vocational and Technical High School | Ankara, Türkiye

2020 – 2024

Experience

Undergraduate Researcher | METU Power Lab | Ankara/Sivas(Hybrid), Türkiye

February 2025 – Ongoing

- Working within the laboratory on the design of power electronics systems, such as TI C2000-controlled low-inductance motor drivers, for TÜBİTAK and industrial institutions.

Committee Chairman | IEEE SCÜ Student Branch | Sivas, Türkiye

November 2024 – Ongoing

- I served as the chairman of the PELS (Power Electronic Society) Committee.
- Participated in international symposiums.

Avionic Design Team Lead | Alpina Roket | Sivas, Türkiye

October 2024 – Mart 2025

- I am served in the design of the Flight Control Computer and Payload Control Computer.

Electronic Design Intern | Robolink Teknoloji | Ankara, Türkiye

March 2022 – August 2022 | June 2023 – August 2023

- I took part in PCB designs for sale on topics such as Laser CNC controllers, Stepper Motor Drivers, Pulse Generators, ESP32.
- Competencies such as SMD Soldering, Oscilloscope Usage, PCB Testing stages were acquired.

Founder | Mergen Elektronik | Ankara, Türkiye

June 2021 – Ongoing

- Personal project sharing platform | mergenelk.com

Projects

Driver Design with 1 kW Power for PCB Motor | METU Power Lab

February 2025 – Ongoing

- Within the scope of TÜBİTAK 1001, the TI C2000 series DSP controlled advanced motor driver design with 1 kW power and low phase induction is being carried out.

Rocket Flight Control Computer | Alpina Roket

December 2024 – February 2025

- I designed a flight control computer based on STM32F411CEU6 microcontroller on a 6-layer PCB to be used for the operational needs of a rocket.
- [Project Documents](#)

Switched Power Supply Design (SMPS) | Mergen Elektronik

June 2024 – October 2024

- I designed a power supply with a 150Watt AC-DC 0-30V output range on a 4-layer PCB.
- [Project Documents](#)

ESP32 Based Laser CNC Motherboard | Robolink Teknoloji

June 2023 – August 2023

- I designed PCBs for ESP32 based Laser CNCs compatible with GRBL software on 4 layer PCBs.

Stepper Motor Driver | Robolink Teknoloji

March 2022 – July 2022

- I designed a PCB for stepper motor control and testing on a 2-Layer PCB without requiring software or an external controller.
- [Project Documents](#)

ESP32 Developing Board | Robolink Teknoloji

August 2022

- I was involved in the design of the ESP32 development board designed for testing ESP32 based applications on a 2 Layer PCB within the company.
- [Project Documents](#)

Memberships & Organizations

Institute of Electrical and Electronics Engineers(IEEE)

- Student Member
- Power Electronic Society(PELS) Student Member

3. International Energy Days | Artificial Intelligence Symposium in Energy | SCÜ 100. Yıl Kültür Merkezi

December 2024

- I worked as a technical team member and stand attendant in the organization.

Language Skills

English

- Listening: B1 | Reading: B2 | Speaking: B1 | Writing: B2
- Sivas Cumhuriyet University Erasmus Language Exam:
 - Written Exam: 86/100
 - Oral Exam: 70/100

Digital Skills

- | | |
|-------------------|-------------|
| • Altium Designer | • Fusion360 |
| • Autodesk EAGLE | • AutoCAD |
| • KiCad | • LTspice |
| • Proteus | • |
